

ARYAN LOKHANDE

Pune, India | aryanlokhande.rmdstic.it@gmail.com | +91 9923100567 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Summary

Final-year IT student with strong backend fundamentals, including REST APIs, data pipelines, and system reliability. Built 3+ production MERN applications, contributed 15+ PRs to open-source backends, and solved 900+ DSA problems. Familiar with SDLC processes and Agile/Scrum methodologies, with a basic understanding of CI/CD pipelines and software quality practices. Ranked 1st at the GDG Hackathon. Seeking SDE roles to deliver production-grade solutions.

Technical Skills

Programming Languages: Python, C++, React.js, JavaScript, Java
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Postman
Database & Tools: MySQL, MongoDB, Git, GitHub, Docker, Linux
Frameworks and Libraries: Flask, Django, Keras, Scikit-learn, Matplotlib, Seaborn

Education

RMD Sinhgad College of Engineering, Pune 2022 – 2026
B.E. in Information Technology, Current CGPA: 7.70
Sou. Vimalabai Garware Jr. College, Pune 2020 – 2022
Percentage: 71.67%

Experience

Open Source Contributor – GirlScript Summer of Code 2025 Jul 2025 – Sep 2025

- Contributed to MERN stack open-source projects, including EduHaven, SaralSeva, TravelGrid, and others during GSSOC'25.
- Worked across frontend and backend, implementing UI/UX improvements and fixing critical backend API bugs to enhance overall system performance.
- Merged 15+ PRs across 5 repositories, fixing 8 critical backend bugs.

Projects

MindScript: AI-Powered Blog App [Live Demo](#) | [GitHub](#)

- Built a full-stack AI blogging platform that automatically generates blog posts using Google Gemini API, reducing manual content creation effort.
- Implemented secure authentication, protected routes, and CRUD operations for managing posts and user accounts.

Tools Used: React.js, Node.js, Express.js, MongoDB, Google Gemini API, JWT Authentication

NexAnime: AI-Powered Anime Recommender [Live Demo](#) | [Github](#)

- Built a full-stack anime discovery platform with a FastAPI-powered hybrid recommendation system that delivers personalized anime recommendations based on genres, user preferences, ratings, and popularity.
- Uses a hybrid recommendation system combining Content-Based Filtering and Collaborative Filtering.

Tools Used: React.js, Node.js, FastAPI, Python, Scikit-Learn, Pandas, NumPy, Tailwind CSS, REST APIs

Yojna Saathi: Scheme Application & Recommender [Live Demo](#) | [Github](#)

- Developed a full-stack grievance and service request management system to digitize complaint registration, tracking, and resolution for improved transparency and efficiency.
- Integrated Cloudinary for scalable file storage, Nodemailer for automated email notifications, and an ML-based recommendation system (FastAPI) for personalized scheme suggestions.

Tools Used: React.js, Node.js, Express.js, MongoDB, REST APIs, Cloudinary, Nodemailer, FastAPI, Python

Achievements

1st Place – Competitive Coding Hackathon (2025)
Organized by Google Developer Group on Campus, AISSMS COE Pune.

2nd Place – Reverse & Blind Coding Event (2024)
Organized by Sinhgad Techtonic 2024, RMD Sinhgad School of Engineering.

3rd Place – CodeChef Competitive Programming Contest (2025)
Organized by Sinhgad Techtonic 2025, RMD Sinhgad School of Engineering.

Finalist – Multiple Internal College-level Hackathons
Participated and ranked in various team-based tech competitions across semesters.

Certifications

- Full-Stack Web Development – Apna College
- Oracle Certified Foundations Associate – Oracle University
- Postman API Fundamentals – Postman
